

FREE MEDICAL CAMP SERVICES ACROSS 3 DISTRICTS

The institute conducts free medical camps regularly, almost every day through the year predominantly in rural areas across 3 districts of Nalgonda, Suryapet, and Yadadri Bhuvanagiri in Telangana state. Organizing free medical camp is a cornerstone of our commitment to community service. These camps are meticulously organized to address the healthcare needs of underserved rural populations. Institute PRO's in coordination with respective village sarpanches, grama panchayats heads, ASHA workers, ANM personals, and other local leaders select appropriate date and place for conducting camp, create awareness among people of the village with help of pamphlets and announcements in public places regarding the objectives of the camp. Medical camps are led by dedicated faculty, supported by medical students, and services provided include comprehensive health check-ups, screening for common illnesses, distribution of basic medication, arranging basic investigation facilities in mega camps, referring the patients to the institute whoever requires in-patient care by arranging pickup vehicle, all free of cost. A total of 19835 patients belonging to many villages across 3 districts benefitted from these health camps from July 2023 to June 2024. Beyond immediate medical care, these camps prioritize health education, empowering villagers with knowledge about preventive health care practice and promoting overall well-being.
